Contents Volume 59, 2001

Reductive leaching of manganiferous ores by glucose and H_2SO_4: effect of alcohols
M. Trifoni, L. Toro and F. Vegliò 1
Solubility of boehmite in concentrated sodium hydroxide solutions: model development and assessment
D. Panias, P. Asimidis and I. Paspaliaris 15
Column leaching of a manganese dioxide ore: a study by using fractional factorial design
F. Vegliò, M. Trifoni, C. Abbruzzese and L. Toro 31
Electrochemical dissolution of nichrome in sulphuric acid
M. Chakravortty, R.K. Paramguru and P.K. Jena 45
Electrowinning of copper from sulfate electrolyte in presence of sulfurous acid
B. Panda and S.C. Das 55
Studies on uranium extraction from phosphoric acid using di-nonyl phenyl phosphoric acid-based synergistic mixtures
H. Singh, R. Vijayalakshmi, S.L. Mishra and C.K. Gupta 69
Use of a mathematical model for prediction of the performance of the simultaneous biosorption of Cr(VI) and Fe(III) on *Rhizopus arrhizus* in a semi-batch reactor
Y. Sağ, A. Yalçuk and T. Kutsal 77
A simulation study on biosorption of heavy metals by confined biomass in UF/MF membrane reactors
D. Barba, F. Beolchini and F. Vegliò 89
Equilibrium model for the sorption of gold cyanide and copper cyanide on trimethylamine ion exchange resin in saline solutions
G.C. Lukey, J.S.J. Van Deventer and D.C. Shallcross 101

Short communication
Sorption recovery of gold from thiosulphate solutions after leaching of products of chemical preparation of hard concentrates
O.N. Kononova, A.G. Kholmogorov, Y.S. Kononov, G.L. Pashkov, S.V. Kachin and S.V. Zotova 115

Special Issue: Biohydrometallurgy and the Environment - toward the Mining of the 21st Century

Introduction
A. Ballester and R. Amils 125

Invited lectures
Past, present and future of biohydrometallurgy
H.L. Ehrlich 127
Chemical and electrochemical basis of bioleaching processes
G.S. Hansford and T. Vargas 135
Importance of microbial ecology in the development of new mineral technologies
D.B. Johnson 147
(Bio)chemistry of bacterial leaching—direct vs. indirect bioleaching
W. Sand, T. Gehrke, P.-G. Jozsa and A. Schippers 159
Direct versus indirect bioleaching
H. Tributsch 177
The molecular genetics of *Thiobacillus ferrooxidans* and other mesophilic, acidophilic, chemolithotrophic, iron- or sulfur-oxidizing bacteria
D.E. Rawlings 187
Detoxification of metal-bearing effluents: biosorption for the next century
B. Volesky 203

The design of bioreactors
G. Rossi 217
Present and future commercial applications of biohydrometallurgy
J.A. Brierley and C.L. Brierley 233
Biosorption of metals. The experience accumulated and the outlook for technology development
M. Tsezos 241
Microbial leaching in environmental clean-up programmes
K. Bosecker 245
Bacterial succession in bioheap leaching
C.L. Brierley 249

Bioleaching
On the kinetics and mechanism of the dissolution of pyrite in the presence of *Thiobacillus ferrooxidans*
T.A. Fowler, P.R. Holmes and F.K. Crundwell 257
Copper recovery from chalcopyrite concentrate by acidophilic thermophile *Acidianus brierleyi* in batch and continuous-flow stirred tank reactors
Y. Konishi, M. Tokushige, S. Asai and T. Suzuki 271
Growth stimulation of sulfur oxidizing bacteria for optimization of metal leaching efficiency of fly ash from municipal solid waste incineration
W. Krebs, R. Bachofen and H. Brandl 283
Biochemistry of sulfur extraction in bio-corrosion of pyrite by *Thiobacillus ferrooxidans*
J.A. Rojas-Chapana and H. Tributsch 291
Dissolution and structural alteration of phlogopite mediated by proton attack and bacterial oxidation of ferrous iron
J.M. Bigham, T.M. Bhatti, A. Vuorinen and O.H. Tuovinen 301

Bioremediation
Bioremediation of a soil contaminated with radioactive elements
S.N. Groudev, P.S. Georgiev, I.I. Spasova and K. Komnitsas 311
Computer-munching microbes: metal leaching from electronic scrap by bacteria and fungi
H. Brandl, R. Bosshard and M. Wegmann 319
Metal reduction by sulphate-reducing bacteria: physiological diversity and metal specificity
J.R. Lloyd, A.N. Mabbett, D.R. Williams and L.E. Macaskie 327

Biological aspects of biohydrometallurgy
Genetic transfer of IncP, IncQ and IncW plasmids to four *Thiobacillus ferrooxidans* strains by conjugation
Z. Liu, F. Borne, J. Ratouchniak and V. Bonnefoy 339
Chemotactic transduction in biomining microorganisms
C.A. Jerez 347
Does aporusticyanin mediate the adhesion of *Thiobacillus ferrooxidans* to pyrite?
R.C. Blake II, K. Sasaki and N. Ohmura 357
Some properties of a novel obligately autotrophic iron-oxidizing bacterium isolated from seawater
K. Kamimura, K. Kunomura, S. Wakai, K. Murakami and T. Sugio 373

Biosorption
Treatment of rinsing water from electroless nickel plating with a biologically active moving-bed sand filter
T. Pümpel, C. Ebner, B. Pernfuß, F. Schinner, L. Diels, Z. Keszthelyi, A. Stankovic, J.A. Finlay, L.E. Macaskie, M. Tsezos and H. Wouters 383
Application of simplified rapid equilibrium models in simulating experimental breakthrough curves from fixed bed biosorption reactors
A. Hatzikioseyian, M. Tsezos and F. Mavituna 395
Biosorption of copper by dried plant leaves studied by electron paramagnetic resonance and infrared spectroscopy
R.P. de Carvalho, K.J. Guedes, M.V.B. Pinheiro and K. Krambrock 407
